OPTIONAL ADD-ON TESTS

Eye Screening

The Singapore National Eye Centre recommends that all adults should get a baseline eye screening from 40 years old.

Procedures	Price
Tonometry	$40 *($43.60)*
Fundus Imaging	$50 *($54.50)*
Fundus Imaging and Tonometry	$80 *($87.20)*
Complete Eye Screen: **Fundus Imaging, Tonometry, Visual Acuity (Far & Near) and Color Vision**	$98 *($106.82)*

Details of eye screening tests:

Fundus Imaging	This involves taking photographs of the retina (inner layer of the eye) using a special camera to detect abnormalities in the retina (such as detachment, swelling and bleeding), and eye conditions such as diabetic retinopathy, glaucoma and age-related macular degeneration.  
Tonometry	Tonometry is a safe and non-invasive procedure that measures eye pressure. Early detection and treatment of elevated eye pressure can help prevent or slow the progression of glaucoma and preserve your vision.
Visual Acuity (Far and Near)	Visual acuity refers to the clarity or sharpness of a person's vision. A person's visual acuity can be affected by a variety of factors, including age, refractive errors (such as myopia or hyperopia), and eye diseases (such as cataracts or macular degeneration).
Colour Vision	Colour vision refers to the ability to perceive and distinguish between different colours.
